

Center Plate Lube Disc

The moly-based lube disc has 2 purposes: To distribute the molybdenum disulphide evenly and to retain its physical properties in the process. We know that the temperature inside an operating center plate can melt low grade products. Our L-270 center plate lube disc is designed to withstand these high temperatures. It's top quality and performance that you've come to expect, at a price that will substantially improve your bottom line.

Material Specifications:

Meets AAR Rule 47 requirements

25% molybdenum disulphide by weight

Dimensions: 11-5/8" O.D. x 3" ID
