FOR IMMEDIATE RELEASE:

Miller Ingenuity Announces the Appointment of Joe Denny to the Position of Product & Market Specialist

April 4th, 2016 ...Winona, MN... Steven L. Blue, President & CEO of Miller Ingenuity, announced today the appointment of Joe Denny to the position of Product and Market Specialist, focusing on Miller Ingenuity's groundbreaking Roadway Worker Protection (RWP) system -Train Alert. Steve Blue commented on the appointment: "Joe is a highly respected veteran in the rail supply industry. He has a deep understanding of new product development, and is an expert in creating new markets for new products. Joe will initially focus on meeting with railroad and transit leaders to help define the next generation of electronic RWP equipment currently under development at Miller Ingenuity. We believe it is critical to involve industry experts to help us specify the vital requirements for this life saving product. Joe will lead Customer Discovery sessions and translate the gathered feedback into product specifications." Joe began his career as a member of the technical staff at Hughes Aircraft Company in Los Angeles, designing collision avoidance radar for General Motors. In 1993, he was recruited by General Railway Signal in Rochester, NY to create a new product development organization. Joe is well known in the rail industry as founder and former CEO of RailComm, a recognized train control technology leader. Joe will report to Kevin Smith, Senior Vice President Global Marketing and Sales.

About Miller Ingenuity

Miller Ingenuity is a railway component solutions company based in Winona, MN. From its earliest days, more than 60 years ago, when its founder, "Rudy" Miller, invented the wick lubricator, the company has demonstrated the ability to conceptualize, design, produce and deliver railroad parts that meet the current and emerging needs of the industry. Their continued innovations are driven by three core motivations: to take on customer challenges, to think more creatively about solutions, and, humbly, to be everyday heroes to customers. They put these beliefs into action based on deep and "shop floor" relationships with customers and on the ability to invent, engineer, and deliver ingenious solutions.
