Miller Ingenuity Signs Exclusive Distribution Agreement with DuraForce Company, LLC, a U.S.-Based Manufacturer

DuraForce™ Fastener Systems now the newest product offering to join Miller Ingenuity's growing list of innovative parts produced or distributed for the Global Railroad Industry.

August 4, 2015 ..Winona, MN... Miller Ingenuity has signed an exclusive distribution agreement with DuraForce Company, LLC, to sell the DuraForce™ Fastener Systems. The patented Fastener System is unique because of its self-locking, vibration-proof technology that extends hardware life while reducing maintenance costs. Like many other Miller Ingenuity products, effective engineering provides for easy installation even at the most extreme conditions.

“We are known in the railroad industry for providing components like our Versylon Liners, Gear Case Seals and Locomotive Truck Part Kits that are easy to install, last longer than our competitors, and are the best overall quality,” said Steve Blue, President and Chief Executive Officer of Miller Ingenuity. “When the opportunity became available to bring the innovative DuraForce™ Fastener Systems into our product offerings, we all agreed they would complement our suite of products and prove of value for our customers.”

About DuraForce™ Fastener System:

- Never before has lateral force been integrated into a threaded fastener to ultimately deflect shock and vibration.
- FEA modeling is implemented to determine the most optimum product designs.
- A patented system creates a free-spinning, single-threaded component, self-locking, vibration-proof fastener system that is as easy to install and dismantle as a standard nut and washer using conventional tools.

ABOUT MILLER INGENUITY

Miller Ingenuity is a railway component solutions company based in Winona, MN. From its earliest days, more than 60 years ago, when its founder, "Rudy" Miller, invented the wick lubricator, the company has demonstrated the ability to conceptualize, design, produce and deliver railroad parts that meet the current and emerging needs of the industry. Their continued innovations in gear case seals, truck parts kits, and heavy-duty wear parts are driven by three core motivations: to take on customer challenges, to think more creatively about solutions, and, humbly, to be everyday heroes to our customers. They put these beliefs into action based on deep and "shop floor" relationships with our customers and on the ability to invent, engineer, and deliver ingenious solutions."

About DuraForce™ Company, LLC

DuraForce™ Fastener Systems, LLC, based in Roanoke, VA, is a consortium of individuals and firms comprised of engineers, technicians, sales consultants and business development executives dedicated to producing and selling highly innovative industrial products.
